

EDUCATIONAL OPPORTUNITIES

What are the Educational Opportunities Available at Media Bridges?

Outreach Services:

Media Bridges has educational opportunities for students and teachers. Classes are held at the Media Bridges facility or can be taken to your school's location. All of our information and activities can be modified according to group or size and adapted to different age ranges and learning levels. If your organization or school has its own media equipment, we can tailor a workshop to teach you how to use it. Our classes are designed to create media literacy through the understanding of how media works as well as empowering individuals and groups with the tools to produce it. Curriculum is based on technology objectives outlined in the Ohio Information Technology Competency Profile that was compiled by itworks.ohio (Information Technology for Ohio's New Economy) and sponsored by the Ohio Department of Education and the Ohio Board of Regents. Some of our class offerings include:

- **Project Bridges:** Group participants will work together to create a media project.
- **Media Literacy:** Through activities and discussion, participants will identify the key techniques and devices the media use to persuade, convince and manipulate the things we see and read in the media.
- **Equipment Training:** We offer various specialized classes on specific equipment for students and teachers.

Available Media Equipment

Media Bridges has the facility and equipment to help you with your media education needs. After completing our classes, teachers and students can become certified in various equipment. Once certified our library style check out allows you to use our equipment for future media projects at your school. Don't let lack of equipment keep you from bringing media into your classroom, let us help!

Community Messages

Is there an event or presentation at your school that you would like to see advertised within the community? Community messages that list events, times and details allow you to inform the public through our cable access stations about what is going on in your school.

Non-Profit Services

Do you want an event or presentation taped and televised on our Education Channel so community members can see what great things you are doing at your school? Let our staff help you create a media piece that showcases these events.

Education Channel

Are you already creating media projects at your school? We have an entire station dedicated to educational issues and projects that would be a perfect opportunity for you to showcase student and teacher work within your district. You can submit tapes by completing an Application for Cablecast and get your school on TV!

CONTACT INFORMATION:
